Essay writing
This was our advert...

This workshop is aimed at Level 2 and 3 students who have written essays and want to improve the quality of their work. We will explore how to use references and determine the level of detail required to develop an economical but effective argument. We will discuss how to remove superfluous material, tightly edit your work, and ensure that there is clarity and cohesion from the outset. It is helpful (but not essential) to attend or watch the ‘Introduction to essay writing (beginners)’ workshop before attending.
Initial polls

Planning recap

• Effective essays are planned so that you have a clear idea of what you are going to do and can then know how to achieve that,

• In our advanced planning session we discussed structuring effectively including some examples of what needed to go into the introduction main body and conclusion,

• We gave some ideas for ways to recognise what was important and highlighted the fact that a plan can give away key clues – it needs to be obvious what is going to come,
A journey

Just like your essay -

• A river starts somewhere
• It goes somewhere
• It has a journey which may be different along the way
An essay journey

• An essay also starts somewhere and it goes somewhere and it will have differences along the way.

• You need to let your reader know this so that they know what to expect. Where are the highlights, when can they relax, what should they not miss and how will they know they are approaching that part of the journey?

• The introduction is the best place to make that clear, but you can also signpost along the way.
Poll time

Which of the following aspects of the essay writing process is most important to you personally?

• Identifying the content
• Articulating how the content relates to the point
• Structuring overall
• Referencing correctly
• Editing
• Critical evaluation
Why did we ask this?

• Different students have a different set of priorities, and at different points within your module and study journey you may be looking to develop certain skills.

• Recognizing your priorities at a particular stage can help you focus your efforts.

• This is particularly important as you progress through your learning as level 2 and above will have a greater emphasis on critical evaluation and analysis.
Main argument

• You need to be clear what your main argument is
• Check the instructions, including process words
• Ideally, a clear central theme or tenet will run through your essay to make that main argument clear
• You have to understand your question to be able to formulate a relevant main argument
• You also have to understand your module content to relate content to theme
An economical argument

- Think about how much you need to describe?
- Description is simple facts about what is
- Explanation is making it clear how these relate to the topic and why they do so
- **How** and **why**
- Don’t use up words describing information if that leaves no space for linking it to the topic and evaluating its importance
Planning & scoping material

- We covered planning in the separate session but this leads to scoping material.
- Scoping means identifying the material and content that needs to go in.
- You must work out what is going to be relevant and equally ignore what is not relevant regardless of how interesting it is!
- Think of your audience – are they white water rafters or ornithologists?
Selecting words and language

WORDS
HAVE
POWER
Weighing things up

• In your essay plan you will have identified various sources of evidence & linked it to the topic

• In your plan you should have considered what to include and in what order, but in writing the essay you can consider weight
Using each source effectively

• Use your words to convey importance and detail to emphasise points or to explain why certain parts are not included

• *Did your white water rafters know what was coming up?*

• *Did you highlight the important birds for the ornithologists?*
Framing your evidence

• Now we have scoped what matters to the argument and the audience we need to present it in a fitting way
• Your writing is the only tool you have to make links, introduce and influence the readers focus
• What have you told your reader you are covering – what do they expect?
Pace and flow

- Look back to our river example...
- The essay must continuously progress, or you are in the doldrums
- But a ride over lots of rapids without any sense of direction can leave the reader confused
- At times the pace can be fast as you are making links and summarising, and at other times it can be slower (when you need a lot of detail)
- It is important to manage the expectations of the reader, make the links where necessary, and foreground things they may need to know
1. Why take Isabella’s river journey

Isabella’s River Journey will be fantastic if you are a white water rafter or an ornithologist. You have cozy wooden chalets to sleep in before you begin & these are equipped with wood burning stoves for cold nights. We give a full safety briefing & have different groups depending on your main purpose. White water rafting groups will take a route with many exciting turns & twists along with rocky parts and thrills & spills. Ornithology groups will have spotter guides & be encouraged to use high powered binoculars to locate neighbouring birds both in & above the water. Prices are reasonable and include transportation from your chosen station. Chocolate is also in plentiful supply
2. Why take Isabella's river journey

Isabellas river journey is a journey like no other. Having unique experience of the terrain, Isabella has unique information about the most thrilling journey (for the white water rafters) and a regular exposure to the wildlife, knowing where the birds are nesting and where to spot rare finds. Her knowledge of the local landscape means that you will see and experience things that may have been missed, and you can also rest assured that Isabellas local knowledge means you will be safe and responsible tourists. Offering excellent value for money, friendly connections and all of the essentials covered, this tour offers a unique highlight of the area.
What was the point of the example?

- Some information was irrelevant to the purpose - what was the specific remit in this case?
- So with essays, information can be correct in itself but doesn’t help convey the correct information - it is peripheral to the point
- In the case of our advert ornithologists don’t care about white water rafting and vice versa
- Equally some information can read well but on closer inspection example 1 doesn’t deliver on the question as well as example 2
The thesis statement is what you aim to deliver in the essay and is a concise summary of this – usually one sentence.
Structure

• You can adopt a structure like this if you wish but the key is to ensuring that the essay funnels in important information
  • So the introduction frames what is needed
  • then the information is covered before
  • the funnel moves back out to summarise
• All words apart from the main content and argument should be framing and shaping essay
Structure ideas - PEE

• PEE
  • Point – make it
  • Evidence – support it with facts
  • Explain – why the evidence is supportive and it is relevant
Structure ideas - PESELS

- PESELS
  - Point - make the point for this paragraph
  - Explain - what do you mean by this point
  - Support - provide evidence from studies and research
  - Evaluate - what is there about this point that is for/against
  - Link - to the essay task
  - Signpost - to the next paragraph
Editing

- This is the point at which all the ideas are neatened up and made as good as possible.
- There are stages.
Fresh Eyes
The task is clear

- Who
- How
- When
- What
- Where
- Why
Structure
Position
I hope the guy who invented AutoCorrect burns in hello!
Editing summary
